## Canadian National Making Low Cost Vacations

Possible for Thousands of  
Residents in Western Canada

Suggestions:  
Jasper National Park,

Minaki,  
Ontario, Quebec,  
Maritime Provinces,  
Overseas Tour.

In arranging low fares for prairie residents, we regard this part of our work as a great and important public service... always ready with men, equipment plus the experience which enables us to care for any movement with smoothness and efficiency.

THIS summer—escape for a little while from the dull sameness of succeeding days. Our low fares from May 15th to Sept. 30th (with a final return limit Oct. 31st, 1929) make it easy.

### THINK IT OVER!

Whatever vacation section you have in mind, our local agent will be pleased to give every assistance. He will be glad to quote lowest fares and make all arrangements for you—or write.

J. MADILL, District Passenger Agent, Edmonton

## CHURCH NOTICES AND ACTIVITIES

### CHURCH NOTICES

Services Sunday, May 5th  
Rosie — 11 A.M.  
Alma Mater — 2 P.M.  
Roseberry — 3:30 P.M.  
Irma — 8 P.M.  
Subject "Why People do not go to Church."

### Sunday, May 12th

Sunday, May 12th will be Mother's Day. Services will be held in Strawberry Plains schoolhouse at 11 A.M.

A company from Viking under the auspices of the Ladies Aid of Irma will put on the play "What Happened to Jones" on Friday evening, May 17.

On Sunday, May 19th there will be held a Reception Service or Confirmation Service for those wishing to unite with the Church. Any wishing to join the church kindly speak to the pastor.

Mr. Wright is holding Preparation Class for the young people, who are thinking of uniting with the Church. The classes begin at 15 minutes to five on Monday and Wednesday evening. All are welcome who wish to attend even if they do not wish to unite with the Church.

### ANGLICAN CHURCH NEWS

A meeting was held at the home of Mrs. Pryce Jones on the afternoon of May 1st, to organize a branch of the Woman's Auxiliary. The attendance was most encouraging, fifteen joined. The next meeting will be held at the home of Mrs. Geo. Higgins on the 2nd Tuesday of the month, May 14th. Any who are interested in this Society will be welcome.

### ANGLICAN CHURCH CONFIRMATION

A Confirmation was held in the Mason's Hall on Sunday, April 28th by the Lord Bishop of Edmonton.

A large enthusiastic congregation assembled to give the support of their prayers to the six candidates, and the service throughout was marked by a real spirit of reverence and devotion.

The Vicar, the Reverend A. M. Tredell, conducted matters, and at its conclusion the Bishop baptised the son of Mr. Jack Fletcher.

The service concluded with the Confirmation and after a beautiful address by the Bishop, the following were presented before him to receive the sacred rite of Confirmation. Mr. Pryce Jones and his daughter, Mary Jones, Mrs. Wilbraham, Mrs. Bert Long, Phyllis Thurston and Elizabeth Higgins.

There were many who found in the service a real reminder of the day when they had been Confirmed and it is to be hoped that the six candidates of last Sunday will find in their experience of that day something which will not only be a joyful recollection but will prove a source of strength for the rest of their lives.

### KINSELLA

The Misses Irene and Maxine Wachter spent a few days in Edmonton last week.

The C. N. R. had the hoist in here the past week they loaded 21 cars of gravel for construction.

Mr. William Anderson has already loaded a number of cars of gravel for the city.

Mr. E. C. Williams has started his contract on the new school south of town.

Mr. and Mrs. Alex Cormack of Calgary are visiting the former brothers Messrs. Robert and Tom Cormack.

We understand that Mr. and Mrs. P. J. Wangness are expected home from the Coast some time during the first of the month. We are glad to report that Mrs. Wangness health has improved considerably.

Rev. A. O. McNeil and bride returned from their wedding trip to Calgary and Banff on Friday. Service was held in the church here on Sunday morning.

Mr. and Mrs. Jack Allen spent Sunday at Killam.

We are sorry to report that Mrs. George Lee is confined to her bed.

Mr. Russel Eckert is working for Mr. E. C. Williams in the lumber yard.

Mr. J. L. Tebo arrived at Irma Wednesday to act as assistant at the Irma Station in place of Mr. J. B. Maroux, who has gone to Edmonton.

## NEWS ITEMS FROM JARROW

### NEWS ITEMS

### FROM KINSELLA

One of the nicest affairs of the winter was held on Saturday evening when the members of the P. A. Girls Club entertained their mothers at a banquet in the high school room. About thirty mothers and daughters sat down to a beautifully decorated table laden with good things prepared by the girls. The room was beautifully decorated in mauve and gold, the Club Colors, and daffodils and pussy willow gave a real springtime look to the tables. The supper, interspersed with group songs and round's was very much enjoyed by all. Miss M. Smith gave the toast to the King, and Mrs. N. Laxton, President of the club gave the toast to the Mothers, which was responded to by Mrs. Bamsey. Mrs. A. Christensen gave the toast to the girls, and Gladys Meakin gave the reply. A duet by Jean Matthews and Vera Morby was sung and heartily enjoyed by all. Mrs. Jenkins then gave the toast to Our Country, which was responded to by Veda Morby. The Club yell was then given and a most enjoyable evening brought to a close.

W. Bridgeman and son made a flying trip to Edmonton this week end.

Harry Symonds has purchased a new De Soto car from Chas. Gravett of Viking, the local dealer.

W. Boyd, who recently purchased the Fisher and Bridgeman store, left for Ryley Tuesday night, where he will be married on Wednesday afternoon. We wish him all happiness in his wedded life.

The Ladies Aid met at the home of Mrs. J. Waite on Wednesday afternoon. A good number were present and a most enjoyable meeting was

brought to a close.

George Fisher has purchased a new Chevrolet touring car.

Quite a number from here attended the play "Wanted — A Wife" in Kinallen on Friday night. The play was very funny and well put on and most thoroughly enjoyed by all who attended.

Mr. and Mrs. J. Miller motored to Edmonton on Thursday and returned on Sunday.

Mrs. Davidson of Edmonton is visiting her daughter, Mrs. Bamsey.

The next meeting of the Community Club will be held on Monday, May 6th. Another good time is promised by the entertainers.

CO-OPERATIVE INSTITUTE  
MEETING

Russell Love, M.L.A., who is district organizer for the Co-operative Institute, which is to be held in the School of Agriculture, Vermilion, from June 24th to 29th, has called a meeting to be held at the School on Saturday next, at 2 P.M. The following from the outside are expected: Mr. Stearns, Innisfree, representing the Co-operative Livestock Producers; Mrs. McNaughton, Ranfurly, representing Women's organizations; Geo. Bennett, Mannville, Director of the Wheat Pool; Mr. A. F. Aiken, representing the U.F.A.; Major Hughes and Wm. Pidurchnay, Vergeville; Mr. Maryland, Secretary of the Co-operative Institute will also be present.

Mr. Love has also suggested that His Worship Mayor Falouts, the President and Secretary of the Agricultural Society, Wm. Telford and Mr. Sutton, the President of the Board of Trade, Mr. Harper, and the President of the Alumni Association of the School of Agriculture be present. All of these have been communicated with and are expected to be on hand. This meeting, of course, will be open to all who wish to attend.

The purpose of the meeting will be to lay plans for the big Co-operative Convention which will be held in Vermillion, at the School of Agriculture on June 24th. Details of the program and speakers will be given, possibly in the next issue.

A good many of the students and those who wish may have accommodation in the School of Agriculture, but it is expected that hundreds of farmers will drive in each day.

W. J. Elliott, Principal.

NOTICE

Irma, Alta., May 1st, 1929

The Editor, The Irma Times.

Sir:

I wish to announce through your columns that Dr. B. C. Armstrong, a specialist in tuberculosis will visit Irma on May 21st for the purpose of examining ex-sanatorium patients and their families. Any others who have been in contact with tuberculosis patients are invited to avail

themselves of Dr. Armstrong's examination, which is free.

Any one wishing to be present

should get in touch with me at once.

Yours truly, W. Barr Murray, M.D.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavor is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

## Canada's Opportunity and Responsibility

It has been said time without number that Canada occupies a paramount and responsible position as interpreter of Great Britain to the United States, and of the United States to Great Britain. Such views have been expressed, not so frequently by Canadians themselves as by leading men in Great Britain and the United States.

Within the past few years the opinion has been expressed by leading citizens of the Empire and of China, Japan, and other Oriental lands, that Canada, because of its geographical position and its rapidly expanding trade across the Pacific, likewise occupies a strong position as interpreter of the Orient to the rest of the Empire. Canada is popular in China and Japan as compared with the United States and European countries.

In the councils of the League of Nations this Dominion also stands high, and deservedly so. It is recognized by other countries, and more particularly the smaller nations, that Canada has no selfish purpose to serve through its membership in the League; that, on the contrary, the Canadian attitude is one of disinterestedness, based wholly in a desire to render service to mankind. The Canadian position in the League has always been for peace, conciliation, recognition of the rights of others, and, especially, not merely fair treatment, but open generosity and sympathy for minorities.

Because of this unselfish attitude, Canadians are welcome in all lands, and the high opinion entertained for this country is proving a real asset to the business and commercial interests of the Dominion in the opening and development of foreign markets for Canadian products.

Now, one of the most influential men in India, Sir Babu Ramachandragore, the world renowned poet, outlines to Canada a duty which rests upon this young Dominion, not only to itself, or to a group of nations, but to wide world. Sir Babu Ramachandragore was a distinguished guest and speaker at the recent Conference of the National Council of Education held at Vancouver, and in his farewell message to Canada he gave expression to views which Canadians everywhere may well read, ponder over, and to which they should give heed.

"Canada," he said, "is too young to fall a victim to the malady of disillusionism and scepticism, and she must believe in the great ideals in the face of contradiction—for she has the great gift of youth; she has the direct consciousness of the stir of growth within her which should make her trust herself, which is the only sure way of trusting the world."

How true this last sentence! A man or a nation which does not trust himself or itself, but lives in an atmosphere of fear and suspicion can never trust others.

Continuing, this great Indian savant said: "Let Canada feel the sacred dawn of her life, that the expectation of human destiny is upon her as upon other sister countries which have just entered into the cycle of their promise. Canada will have to solve for the salvation of man the most difficult of all problems, the race problem, which has become insolvent with the close contact of communities that had their isolation for centuries in their geographical and cultural exclusiveness. Canada will have to reconcile the efficiency of the machine with the creative genius of man which must build its paradise of self-expression, reconcile science with religion, individual right with the social obligation that it must acknowledge; she must dream of the introduction of honesty even in politics, which is the self-interest of the nation, knowing that such interest can only have its sure foundation in international friendships. She must ever hope to be able to win the heart of the world by offering the best that she produces."

Although his actual knowledge of this country was limited, Sir Babu Ramachandragore said Canada possessed powers of character and material resources that would enable her to carve out a destiny free from "the fatigues that old civilizations suffer from in the shape of cynicism."

This is an inspiring vision of Canada's place in the world. It is one that calls for the best that every citizen, regardless of his race or creed, can contribute. And it is because the Canadian people of tomorrow will be a development of the cosmopolitan population of today that the Canada of the future will find within itself the ability, the sympathy, the international viewpoint, which will make possible such a great contribution to the future of mankind and the ultimate and lasting peace of the world, for, until the race problem is solved there can be no peace in any country, or in the world at large.

### Sleepers In Buses

**Line Between Buffalo and Cleveland Has Comfortable Berths**

A bus with sleeping accommodations was exhibited in New York recently. It has gone into service between Buffalo and Cleveland, according to the Great Lakes Stage Line, which operates between those cities and Philadelphia and New York. The bus will accommodate eighteen persons in six double and six single berths, all with outside ventilators. An electric ventilating system changes the air every five minutes.

### From Youth to Age

There are three trying periods in a woman's life: when the girl matures to womanhood, when a woman gives birth to her first child, when a woman reaches middle age. At these times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor.

### Lend Household Treasures

**Royal Family Very Generous With Things For Exhibition**

An instance of the true democracy of our Royal Family is surely to be found in the way in which their household treasures are nowadays lent freely for exhibition to the public. After the Lansdowne House collection of domestic art treasures comes the Loan Exhibition of old English plate at 25 Park Lane, Sir Philip Sassoon's London home, to which the Queen, the Prince of Wales and the Duke of York have all lent household silver which members of the public would never otherwise have been privileged to see.

Policeman: How did the accident happen?

Motorist: My wife fell asleep in the back seat.

Minard's Liniment for the Grippe and Flu.

### Ontario Man Inherits Title

**Will Go To France To Take Possession Of Property**

Count Richard du Manoir de Janyo has lived for 25 years in one-half of a frame house in the village of Westmeath, near Pembroke, Ontario. All that time he has known he was next in line to the family estates and titles, together with the fine old Norman chateau. The property which has now fallen to the Count on his succession to the family title is situated near Bayeux and it is his intention to leave Westmeath for France and his ancestral home together with the Countess and their son and heir.

The Count, who acted as house painter and general handy man in the unpretentious village of Westmeath, was known as Richard Du Manoir. This is the second European title to be inherited by a Canadian within the past few weeks, the other case being that of the Earl of Egmont former rancher of Pridi-

s Alta.

### FEELING TIRED AND DEPRESSED

**Then Try the Treatment With Dr. Williams' Pink Pills**

It is good to feel tired after hard work, but day after day and week after week that kind of a tired feeling Eut to be weak all the time never to feel strong and vigorous to be breathless at the least exertion, denotes exhaustion of health, denotes the force having served 22½ years, and is going back to the Arctic regions not with the Mounties but with private exploration interests. For several years he was in charge of the farthest north outpost of the R.C.M.P. On his first northern trip he started for Edmonton with dog teams and canoes as his only means of transport. This time aeroplanes and motor sledges will be used.

The object of the expedition is to explore for minerals. The country around Chesterfield Inlet, according to Clay, is the wealthiest in the world. They are carrying a motion picture outfit with them. For the past three years Clay has been a successful fruit-grower at Grimsby.

Strangled With Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. Williams' Pink Pills quickly is beyond measure. Where all was suffering comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

Ship Muskats To North China

Eight thousand live muskats are to be shipped from the Swan Lake Fur Farm, Quesnel, B.C., this summer, it is stated by officials of the company. Three thousand are to go to North China and smaller numbers to England, Scotland, and other countries on the continent. The Swan Company estimates that it has a total of 50,000 rats on its farm.

Ready-Made Medicine—You need

no physician for ordinary ills when you have Dr. Williams' Electric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable; for scalds, burns, bruises, sprains it is unsurpassed; when you catch cold and the like it is an unquestioned healer. It needs no testimonial other than the user and that will satisfy anyone as to its effectiveness.

Use Minard's Liniment for the Flu.

The longest and deepest canyon in the world is the Grand Canyon of the Colorado River. In some places it is more than a mile deep.

Growth Of Tree-Planting

**Eight Million Young Trees Planted Annually In the West**

In connection with the distribution of trees to prairie farmers in Canada which is made annually by the Tree Planting Division of the Forest Service, Department of the Interior, it is interesting to note that each spring nearly 8,000,000 young trees are sent out; shipment of these trees require 2½ carloads of moss and nearly 10 miles of 45-inch burlap. Before many years are gone, the "treeless prairie" will be a thing of the past.

Garnet Wheat Trial Shipment

Between 4,000 and 5,000 bushels of wheat has been shipped overseas, for trial in flour-making under joint arrangements of the Dominion Department of Agriculture and the Canadian Wheat Pool. The future of this type of wheat will largely depend upon whether this present lot meets with favor among the millers of Great Britain and Germany.

An Oil Of Merit—Dr. Thomas' Electric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the most quinine oil of commerce is applied to the human body. It is a rare combination and it won and kept public favor from the first. A trial of it will carry conviction to any who doubts its power to repair and heal.

Employer—Can you show a recommendation?

Job Applicant—Why, er'er, was recommended to mercy by a jury once.

Even a man of steel may lose his temper when he gets hot.

Minard's Liniment for Coughs and Colds.

## NURSES ADVISE

Zam-Buk, because they have proved

that it does what is claimed for it. Miss E. M. Avery, graduate nurse, of 3229 Michigan Ave., Chicago, says: "I have a patient who suffered terribly with piles. Zam-Buk is the only remedy that gave her relief."

"I have used Zam-Buk myself for the same ailment, also for sores and burns, and have the greatest confidence in it."

**Zam-Buk**

### Explore Arctic For Minerals

Sergeant Clay, Superannuated Mountie, Johns Private Party

Staff-Sergeant Sidney G. Clay, or the Royal Canadian Mounted Police, left Toronto recently en route to the Arctic Circle. He is superannuated from the force having served 22½ years, and is going back to the Arctic regions not with the Mounties but with private exploration interests.

For several years he was in charge of the farthest north outpost of the R.C.M.P. On his first northern trip he started for Edmonton with dog teams and canoes as his only means of transport. This time aeroplanes and motor sledges will be used.

The object of the expedition is to explore for minerals. The country around Chesterfield Inlet, according to Clay, is the wealthiest in the world.

They are carrying a motion picture outfit with them. For the past three years Clay has been a successful fruit-grower at Grimsby.

## Dirigible Air Ships To Be Given Further Tests To Vindicate Their Worth

Germany and Great Britain preserved their faith in the future of the dirigible airship after a series of untoward accidents in lighter-than-air machines had largely discounted their value in the opinion of other experts. The recent flight of the Graf Zeppelin from Friedrichshafen, Germany, to the Holy Land, and its safe return, however, will go far to vindicate the decision to give the dirigible further tests before placing it in the discard, and indeed will be correspondingly enlightening in the maiden voyage of the new British craft. It is expected to cross the Atlantic to Canada later in the year, but much more remains to be done before the dirigible can be accepted as a permanent factor in aerial transportation.

The Graf Zeppelin returned to her base, comprising a voyage of 5,000 miles and of three and a half days' duration, the exact time having been 81 hours and 30 minutes. This was the second long cruise of the giant dirigible and in mileage exceeded that of either the trip to the United States or the return trip—of last year. En route outward bound the dirigible passed over Lyons and Marseilles, France; Corsica, Rome, Messina, Corfu, Crete, Cyprus, Haifa, Jerusalem, Crete and Athens, then back along the Adriatic Sea by way of Hungary to Vienna, Ulm and Friedrichshafen.

On its Atlantic trip last year, the dirigible encountered rough weather shortly after it started eastward. On the first night out high winds made cruising as dangerous as it was off Newfoundland, on the return trip to Germany last year. Perhaps the most striking paradox of these modern times came with the arrival of the Zeppelin over the Holy Land, where the means of transportation are still mainly what they were thousands of years ago—camels and donkeys. The airship was first sighted off the Mediterranean coast seaport of Jaffa in the afternoon of Tuesday, March 26, the large German colony located at the foot of Mount Carmel, giving chase.

Spectacularly, however, the most impressive spectacle witnessed by the passengers in Palestine, came when flying over Tel Aviv, on the day of rejoicing commemorating the Biblical story of Queen Esther. Throngs of visitors from all parts of Palestine had gathered to participate in this year's extraordinary celebration, featured by carnivals, masquerades, balls and street parades. The great dirigible descended to a height sufficiently low to enable the gay, cheering throngs, most of them picturesquely costumed, to read easily the airship's name. At different places in Tel Aviv small bags were dropped containing mail.

Jerusalem, where many of the Zeppelin's twenty-seven passengers expected to receive the deepest thrill of the cruise, was reached in the dusk of the evening, so little that it could be seen, though the ship circled the Holy City for a full hour. Press despatches told of turbulent Moslem sheikhs gazing from centuries-old roof tops and crying "Allah, may thy name be praised; how great are thy wonders!" On its way homeward, favored by auspicious weather, the dirigible averaged about thirty-two miles an hour.

"You said you want me to give your friend literary work? Is he an optimist or a pessimist?"

"What difference does that make?"

"It makes a lot of difference. I want him to edit a seed catalogue."

Uncle: "I suppose you two are putting something by for a rainy day?"

Young wife (brightly): "Oh, rather. We're saving up hard for a closed car."

"You are an absolute nuisance with your everlasting washing. If this goes on I shall have to buy a second shirt." —Ullie, Berlin.

W. N. U. 1782

### Success In Two Years

Englishman Now Called Turkey King Of Fraser Valley

Two years after Jesse Throssell came to British Columbia from Bedfordshire, England, he was styled the "Turkey King of the Fraser Valley," a fertile farming country near Vancouver. In the spring of 1927, a few months after his arrival on the farm he bought in the Fraser Valley, Mr. Throssell sent to England for two pure-bred hen turkeys and one tom turkey, and with this nucleus raised a flock of seventy birds that year, in the autumn of 1928 he had between 500 and 600 turkeys ready for the market. He exhibited at the Vancouver Winter Fair in 1928, winning the principal prizes in all the classes which he entered, including gold medals and first prize for the best turkey, and first prize and special prize for the best pair. He also won in the dressed turkey classes six dressed turkeys which weighed a total of 150 pounds were put up at auction and sold to the Lieutenant-Governor of British Columbia for \$15,750. For the best bird of the lot the Lieutenant-Governor paid \$45; R. weighed 27 pounds. Mr. Throssell recently shipped a number of turkeys to Australia for breeding purposes.

### World Feed Grain Supply

Canada and U.S. Practically Only Countries Showing Increased Production

The total feed grain crop from reporting countries, which are practically confined to the Northern Hemisphere and excluding Russia and China, figures for which are difficult of access, is now, however, estimated to be about 18,000,000 short tons, being an increase of approximately 6 per cent. over 1927, and 5.6 per cent. over the five-year average. Thus the greater part of the increase is derived from countries which habitually export surplus stock, chiefly the United States and Canada, from which a 9.5 per cent. increase is reported, while the importing countries for the second consecutive year, and with an insignificant carryover, have harvested a comparatively inadequate supply.

### Naturalists' Association

British Empire Naturalists' Association Has Established Branch In B.C.

The British Empire Naturalists' Association of London, England, has established a branch of the organization in British Columbia to deal with matters regarding the recording of Nature notes, arrival and departure of wild birds, the dissemination of literature dealing with natural history, the protection of wild life and the promotion of the maintenance of Nature reserves and sanctuaries, where rare and interesting species may be preserved and studied in a state of nature. W. A. Nicholson, formerly Natural History Editor of "The Shooting Times," London, has been appointed Record-keeper with offices at Sea View, Gibson's Landing, B.C.

### Canada's Fruit Imports

Large Amount Paid For Various Fruits and Vegetables

Canada, growing the finest apples in the world, imported \$1,124,000 worth of apples last year.

The imports of other fruits, such as grown in Canada, were as follows: Grapes, \$1,189,000; melons, \$98,000; peaches, \$663,000; pears, \$92,000; plums, \$544,000, and strawberries, \$832,000.

The same conditions apply to vegetables, of which we imported over eight and a half million dollars' worth last year, including half a million dollars' worth of onions, over three-quarters of a million dollars' worth of potatoes, and a million and a half dollars' worth of tomatoes.

The Mean Husband: "If you lost me, you would have to beg for money."

Harassed Wife: "Well, it would come fairly natural."

Custom: "I want a pair of silk stockings for my wife."

Salesgirl: "Sheer?"

Customer: "My good girl, if she was here I'd let her buy them herself."

He: "I've never seen such dreamy eyes."

She: "You've never stayed so late before!"

## Riders on New Trail

Trail Riders at the Glacier Ford.

While most of it members are trying hard to qualify for the 500 mile button it is a remarkable fact that more members of the Trail Riders of the Canadian Rockies have ridden upwards of 2,500 miles of trail than have qualified only for the thousand mile badge. That there are now over a thousand members endeavouring to improve their mileage standing also demonstrates the success the organization has attained during its few short seasons of existence.

The Annual Great Trail Ride and Pow-wow is each year attracting new riders and a wider interest. This year's ride, lasting four days, is fixed to start on August 1st.

The plans are that the start should be from Banff and the ride continue up Heady Creek and Sun Valley to Simpson Pass, where the first camp would be pitched.

The second camp would be on the shores of Shadow Lake under Mount Ball. This would allow of a side-trip partly by pony and partly on foot to the bewitchingly beautiful Egypt Lake.

A few days after this four-day ride to last about 17 days is being planned for the Columbia Icefield Camp, said to be the highest in the British Empire.

The ancient sport of Japan, fencing, is still taught to the children. It is part of their regular school work.

**Honey Production In West**

Honey production last year in the three Prairie Provinces—Manitoba, Saskatchewan and Alberta—had a total value of \$1,011,010, of which Manitoba accounted for \$886,130; Saskatchewan, \$77,060, and Alberta, \$66,200.

**Music Teacher:** "What is an opus?"

**Pupil:** "It's what you holler when you call the cat!"

## SPRING

GRANDMOTHER was a wonderful housekeeper in her day and generation. Every spring, up came the carpets; down came the pictures and heavy lambrequins; out went the furniture, and in came soap and water and scrubbing-brush. Soon the floors and woodwork gleamed like new; the carpets were replaced after a beating that sent every particle of dirt swirling away in a cloud of dust; the furniture was cleaned and returned to its accustomed place. Everyone was miserable, including grandmother—but it simply had to be done.

Women, now, are better housekeepers than grandmother ever was or ever could be, for they have modern conveniences to make them so. They have learned, through advertising, of the many utensils that make housework lighter and do it better. They have learned, through advertising, of better foods and how to prepare and serve them more attractively. They have bought, because of advertising, the many time and labor saving devices that we have come to regard as every-day necessities.

Because of advertising, women have more time for relaxation and the social amenities. They look younger. They are younger — by years — than grandmothers at the same age. Advertising has made that possible.

"Read the advertising and stay young."

It's Better to Buy at Home

## The Wastebasket

When a lawyer makes a mistake, says an exchange, it is just what he wanted because he has a chance to try the case over again. When a doctor makes a mistake he buries it. When a judge makes a mistake, it becomes the law of the land. When a preacher makes a mistake, nobody knows the difference. But when the editor makes a mistake—good night!

"What course should the horses follow when she discovers a guest is neeved because the people won't stay on his knife?" asks a local hostess of our "social editor." Answer—Advise him to mix them with mashed potatoes.

The editor of a paper in a neighboring town put a young fellow on as reporter and urged him to be brief. Here's how he wrote up an account of an afternoon tea of the ladies: "Mrs. Lovely poured; Mrs. Jabber roared; Mrs. Duller bored; Mrs. Raspiny gored; and Mrs. Embonpoint scored."

Heard at the poker club: "Does your wife treat you the same as she did before you were married?" "Not exactly; before we were married when we had a row she refused to speak to me."

A farmer who has voted the old party all his life, drove his team in front of a doctor's office at Toftield, and stepping inside, said: "Doc, the first time you are out our way I wish you'd stop and see my wife." "Is she sick," asked the man of pills and lotions. "Not exactly," the farmer replied. "What's the trouble, then?" asked the doctor. "Well," the farmer replied, "this morning she got up at the regular hour, about four o'clock, milked the cows, got breakfast for the hands, done her housework, churned, and along about ten o'clock she felt a little tired. I expect she needs a tonic, or something."

### NOTICE

IN THE MATTER OF THE ESTATE OF JAMES NIGEL CARLTON SETON, LATE OF THE VILLAGE OF IRMA IN THE PROVINCE OF ALBERTA, Deceased, Farmer.

NOTICE is hereby given that "all persons having claims upon the estate of James Nigel Carlton Seton, who died on or about the 29th day of January, A. D. 1929, are required to file with the National Trust Company Limited, 10076 Jasper Ave., Edmonton, or Agnes Seton, 10076 Jasper Ave, Edmonton, Executors of the Estate of James Nigel Carlton Seton, deceased, by the 31st day of May, A. D. 1929, a full statement, duly verified, of their claim and of any security held by them and after that time the executor and executrix will settle the estate of the deceased among the parties entitled thereto having regard to the claims so filed only or which have been brought to their knowledge.

DATED THIS 17th day of April, A. D. 1929.

TIGHE & KERR, Imperial Bank Chambers, Edmonton, Alberta, Solicitors for The National Trust Company, and Agnes Seton, Executor and Executrix of the Estate of James Nigel Carlton Seton, deceased.

**Better Seed and  
Larger Crops**

(By H. G. L. Strange, Fenn, Alberta, President, Canadian Seed Growers' Association.)

The farming world of Canada this last year has been filled with discussions in regard to practically everything that enters into production, transportation, processing, and delivery of Canadian grains on the world's markets.

One important factor has come out of it all, and is not disputed, which is, that Canada is in serious danger of the loss of her hardy wheat reputation for hard red spring wheat.

There is no disputing that if this reputation were to be lost it would be a catastrophe for the farmer of Canada, because it would mean at the outset that Canadian wheat would have to come into competition, on an equal basis, which it seldom has had to do up to the present, with the enormous quantities of hitherto regarded as inferior wheats from other wheat-exporting countries. Most certainly this would mean not only lower prices but a higher marketing cost as well because it would be more difficult to sell due to less eager demand.

Apparently the wheat raisers of Canada too long have regarded themselves as occupying a preferred position and have really come seriously to think that the person who buys their wheat should be satisfied with exactly what the Canadian farmer wishes to supply them with and should, in fact, regard himself as more or less of a lucky person to get this wheat at all.

This mental attitude on the part of the farmer is, of course, all wrong, and if continued will certainly lead to disaster. The unpleasant fact remains that the real master of the whole situation is the buyer and not the producer, and that if Canada wishes to remain as the supplier to the world's markets of the highest quality of wheat, that will fetch a premium above the wheats from all other countries, when it is vitally necessary for the wheat producers of Canada, through their marketing organizations and other agencies, to take considerable pains to find out exactly the kind of wheat their customer demands and exactly the grade and shape in which the customer desires this wheat to be delivered.

The world's buyers require only a minimum of two grades of Canadian wheat. The unpleasant fact remains that last year some 450 grades of Canadian wheat were offered by farmers to the marketing agencies for sale. By actual count, with our present grades and varieties, it has been computed that no less than 2,023 grades could be produced. The great bulk of which grades are absolutely and entirely unnecessary and preventable.

Without recounting the many factors that go to make up all these unnecessary grades it is sufficient to state that a great number of them are caused by the mixing of different varieties. Therefore, no small number of this great mass of unnecessary grades can be eliminated, by the farmer himself this coming year if he will determine to seed only seed that is pure, clean, reasonably true to variety and the right variety for his district.

Not only will the crops produced from such seed mature more evenly than scrub seed, not only will they give a higher yield because of the careful selective breeding work behind them, but in addition they will give a higher grade because of the trueness to variety.

This last year, for instance, because of the frost, was a very hard year for all wheats excepting the early varieties. Yet it was noted by skilled professional observers that whenever good true-to-variety seeds had been selected, particularly registered seed, even with the later varieties, that the resulting crop was much less harmed by frost and so commanded a much higher grade than the average run of crops of the same variety.

The air is full of co-operation these days but the farmer must not forget that only a small step in co-operation has been accomplished by co-operating together to put in an agency to market crops. True co-operation means that the farmer himself in turn will do everything within his power to co-operate, not only with his marketing agency, but also with the purchaser of his products. Both of these mean actually the same thing, producing as nearly as possible the kind of product the customer demands and in such shape as he requires.

As far as the wheat industry is concerned, this simply means that crops will be produced which are as clean as possible and as true to variety as possible and of that variety which is most acceptable to the world's purchases which as far as the bulk of Alberta wheats is concerned

means hard, red spring wheat, of high milling value.

To secure these kind of crops it is necessary for the first step to sow seed of the right variety and which will be as clean as it can be made, which will contain practically no weed seeds nor other kinds of grain, and which will be of strong vitality and germination.

If the bulk of western Canadian wheat growers would do this very simple thing there would never be the slightest danger of Canadian wheat losing the fine premium over all other wheats, which it has enjoyed in the past and should command in the future. Incidentally, too, the work of those who market this wheat will be easier and carried on more cheaply. There is no money spent by the farmer which will bring him in such big profits as that spent in securing good, clean seed.

**THE BURNSIDE POULTRY FARM**

Port Hammond, B. C.

This farm is situated two miles north and east of the town of Port Hammond and twenty-five miles east of Vancouver on the main line of the Canadian Pacific railway. It is the home of over 6000 S. C. White Leghorn and Light Sussex birds, and is located in ideal surroundings for these exacting members of the feathered tribe.

This plant had its beginning on a very hilly plot of land and during the years of its growth has grown to over fifty acres of rich farming land with every necessary for producing the highest quality stock, from which we hope our customers and ourselves shall mutually benefit.

Should any of the readers at any time happen to be in this vicinity the plant is cordially invited to inspect the plant that has supplied extensively many poultry farms with stock from which they have made good. The whole farm is under the able inspection of the Dominion Live Stock Branch of Agriculture.

**Mature Stock**

For over 14 years we have bred and improved our S. C. White Leghorns, and our strain is known in many parts of Canada as hardy, prolific birds, noted for their size and depth of bodies, together with the alertness showing the most necessary qualities—health and vigor.

Since for generations these S. C. White Leghorns have been bred with the utmost care, the results are very high quality birds with high egg records behind them and which we are ready to recommend to any person engaging in the poultry industry, large or small.

The main incubating section contains three mammoth electric Peterline incubators, and in conjunction with these are several of the latest types of 540 egg machines which have also given the best results. The total incubating capacity is approximately 45,000 eggs and this number is reset again every eighteen days.

**Breeding Stocks**

Breeders are carefully selected and mated to pedigree, unrelated male birds all true to type. We have never practiced nor do we believe in breeding from pullets. We use only hens that are one, two and three years old. We have had stock tested for Bacillary White Diarrhoea. These birds are given every chance during the winter months, having at least three months' rest, so that the best results from hatching may be secured.

None of these birds are forced for heavy egg production since the idea is to secure in the spring good, fertile hatchable eggs, from which we get vigorous, husky chicks that grow into profitable stock.

We are not just a commercial hatchery procuring stock from outside points, but have over 3000 breeding hens owned by ourselves. Should the demand be greater than our supply from our stock, we try to secure the extra from what we know to be reliable stock, but the customer is previously informed of this probably arrangement and the shipment is only made on his advice.

**EXCHANGE FARM YOUTHS**

Under an arrangement between the colonization department of the Canadian National Railways and the German Student's Co-operative Association, three young men from Germany have been placed on large farms in western Canada. Three others were also placed in eastern Canada and six Canadian youths will be given an opportunity to acquire similar experience in Germany in exchange.

All of the young men are graduates of agricultural institutions in Germany. After working on the land until after the harvest they can if they wish, attend an agricultural college for the balance of the year they will spend in Canada or they can remain on the farm for the full period.

**IRMA HIGH SCHOOL REPORT  
FOR MARCH AND APRIL**

Grade XI.—Morris Wright (8, 4, 1) Viletta Wright (6, 0, 2). Grades X and XI.—Myrtle Glasgow (7, 2, 2); Grace Love (6, 0, 2); Mary Landers (6, 0, 2); Frank Maguire (6, 1, 1); Margaret Rae (6, 0, 0).

Grade X.—Florence Allen (6, 2, 1), Eleanor Barber A.H., Beulah Blade (7, 0, 2); Helen McDowell (8, 2, 2), Marjorie Locke, A. H., Bernice Mathison (7, 1, 1), Ethel Milburn A.H., Harriet Nash (7, 1, 0), Beril Sellstedt (7, 0, 2), Violet Simmons (7, 1, 2), Phyllis Thurston, S.S.

Grade X.—Eve Congdon (6, 0, 2); Vera Herbert (6, 0, 3), Elizabeth Higginsong (5, 2, 0), Herbert Smith (6, 3, 0), Vera Thorp (6, 0, 2).

**IRMA L. O. L. 2066**

A well represented meeting of the above lodge was held on 25th April.

Two minutes silence was observed by the lodge in respect to the late M. W. Hon. Dr. J. W. Edwards Past Grand Master of the Grand Lodge of North British America.

The Lodge decided to celebrate the 12th of July at Vermillion. The Vermillion Lodge and Victoria County are making a great effort to make this celebration one of the most successful ever held in Alberta. Lots of music, a big sports program and several well known speakers will help to make this a day to be remembered.

**TENDERS FOR SCHOOL HOUSE**

SEALED TENDERS will be received by the Board of Trustees of Crescent Hill School District No. 4375 at the office of the Secretary-Treasurer up to noon May 25th for the erection of One roomed Frame school building after Plan Number B.4.

Plans and specifications may be obtained from Secretary-Treasurer on payment of a deposit of \$5.00. Plans must be returned within 24 hours, and deposit will then be refunded. A marked cheque for five per cent. of the amount of tender should be enclosed with each tender as a guarantee that same is bona fide.

The lowest or any tender will not necessarily be accepted.

—W. T. Steele, Sec'y-Treas., P.O. Irma, Nearest station Fabian & Hawking, 4 1/2 miles distant. 2-T.

Now is the time of the year to advertise for those stray horses and cattle. A small ad in this paper will help you.

**Household Hints****LEMONS IN THE KITCHEN**

By Margaret Tatroe

Lemons are so useful that it is wise to keep a supply on hand. If kept in a glass jar they will not dry out. Lemons which become dry may be made soft and juicy by placing in a pan of hot, not boiling, water and leaves on back of stove for a couple of hours. Then wipe dry and when they are cold, they will be ready for use.

In cooking, where a recipe calls for one lemon, it is best to use three tablespoons of juice as lemons vary in size.

To peel lemons, oranges, or grapefruit cover with boiling water and let stand a few minutes. Then when peeling, the inner white bitter skin comes off too.

Small pieces of lemon pulp put into frosting for a layer cake give it a good flavor. Lemon juice is a good flavor for white cookies, and grated lemon rind is fine for sponge cake.

A few drops of lemon juice added to canned salmon, and to boiled greens give the dish a delicious flavor. Use lemon juice in place of vinegar for salad; it is much more healthful and gives a better flavor. When preparing horseradish, if lemon juice is used instead of vinegar there is a wonderful improvement. Lemons improve the flavor of saskatoons. Slice a lemon into the berries when putting them on to cook for sauce.

A slice of lemon added to over ripe fruit or jelly will not only keep the necessary pectin, and gives a clear firm jelly, without giving the jelly a lemon flavor.

When making pastry add a little lemon juice to the water, and the pastry will be lighter and will not taste of lard.

When whipping cream, if several drops of lemon juice are added to a pint of cream the cream will whip in half the time.

If a little lemon juice is added to the water in which tough meat is cooked less time will be required to cook the meat tender.

To make candied lemon peel, take the peels from half a dozen lemons, cover with cold water and heat. Cook slowly until the peels can be easily peeled with a tooth pick. Drain and when cold remove the white membrane with a spoon. Make a syrup of one cup of sugar and half cup of water. Boil the peel and place peel out of doors till cool, and well dried.

## PROOF OF DYES is in the dyeing!

Words won't dye a dress, coat, or sweater. It takes real dyes to do that. That's why Diamond Dyes contain from three to five times more dye than other dyes—by weight.

It's the quality in Diamond Dyes that do the work; that give the colors such brilliance, such depth and permanence. It's real dyes that keeps them from giving things that they don't look; from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. They come in small boxes, low cost, but they do the colors. Other dyes may keep their brilliance. Your dealer will reward your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye *any* silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool to a fresh, fresh finish. When buying—remember this. The blue package will dye every kind of goods, including silk and wool. Your dealer has both packages.

### Why Cement and Plaster Need Painting

It is seldom one sees a cement, concrete, stucco, plaster or brick surface painted. It seems to be the general assumption that these substances are amply able to protect themselves from weather and other destructive conditions.

But that is a mistake. It is well known that cement is a moisture absorber, and it isn't true that the moisture does not harm it. It is almost as important to prevent rain from penetrating the surface of the rough mineral outside as it is to protect wood and iron from rain.

But just any kind of paint will not do. It must be a special cement paint having a chemical composition not affected adversely by lime or alkalis.

It is important that owners of commercial and manufacturing buildings, grain elevators, residences, garages, silos, etc., with absorbent outside surfaces, should realize the advantages of painting them—that they will last longer, look better and need fewer repairs after being so treated.

Many accidents happen from warming varnish and other mixtures that contain inflammable liquids. Almost every day it happens. "Hep-pens" does not seem to be the best word to use, however, for it was discovered that such "accident" (another wrong descriptive word) are usually the result of want of common horse sense.

Anybody should know that to place highly inflammable substances like turpentine and benzine by a hot or even warm stove is more than likely to cause an explosion. "She was heating a pot of varnish on the stove and it exploded." Of course it did; did she think it would simply boil over, like a pot of soup?—Painters' Magazine.

### Moose Jaw Board of Trade

The recent three days' drive for membership in the Moose Jaw Board of Trade, with an objective of 1,000 members, went over the top with 1,200 paid up members secured.

Lady in library: "Have you been reading Longfellow?"

Roughneck: "Naw, only about ten minutes."

### Clean Up Every Yard

The pupils of the schools should be thoroughly sold on the idea that they have a definite part in the work of cleaning up and painting up. Many a father will reward his boy handsomely for having the cleanest and neatest backyard in the neighborhood.

The girls will find a new delight in putting the flower beds in order, washing the woodwork, and otherwise helping mother to make the entire interior spick and span.

Every yard should have the weeds removed. The lawns should be mowed and raked, the shrubbery pruned, the hedges trimmed, and all rubbish carried away or burned.

If there are any little depressions in the yard which accumulate water, fill them up. A pool of stagnant water a foot square can easily give birth to a swarm of fever carrying mosquitoes.

### Spanish Cream

1½ cups Borden's St. Charles Milk diluted with 1½ cups of water.

½ teaspoonful salt.

½ cupful sugar.

3 eggs.

3½ tablespoonsful granulated gelatine.

1 tablespoonful vanilla.

Let the gelatine stand in the milk for five minutes, then scald the mixture. Combine the egg-yolks, sugar and salt with the scalded milk, and cook until slightly thickened like custard. Then stir the mixture into the egg whites beaten stiff; add the vanilla. Turn into individual moulds which have been dipped in cold water and when set unmould and serve with light cream, or any preserved fruit.

### Demand For Farm Machinery

Implement houses at Moose Jaw and Swift Current are exceptionally busy at the present time filling orders for spring farm machinery. It is understood that the International Harvester Company will have at least another twenty carloads of machinery shipped into Swift Current this spring, while the Massey-Harris Company is also handing a heavy volume.

Austria produced in the past year nearly 15,000,000 pairs of shoes.

### Had Thought For Troops

Prince Of Wales Countermanded Order For Parade Owing To Weather

On the day the Prince of Wales presided over the first Royal Review of the year at St. James's Palace, Pall Mall, London, elaborate ceremonial had been arranged. He was to drive in his silver and gilt coach from Buckingham Palace, the King's London residence, to St. James's attended by a squadron of the Horse Guards in full parade equipment, including highly polished steel cuirasses and enormous plumes.

The weather turned intensely cold, and the discomfort this parade would have occasioned—not to himself, for he would have been well sheltered in the coach, but to the troops that were to take part—once appealed to the Prince. Half an hour before the ceremony was to begin, he quickly countermanded it, and walked from the modest bachelor quarters he occupies in York House held by Little was added about this at the time, but a few of the 47,000,000 inhabitants of some gray little islands in the Northern Seas took note of it and approved.

### Home Decorations

A little money goes a long way in furnishing a home if it is wisely spent. A plain painted wainscot in a light, pleasant color, or light-colored monograms or neatly patterned wallpaper does not cost very much, but goes a long way toward giving a room a smart appearance.

When painting, always have a clean rag to keep the hands clean and remove spots from windows, hardware fittings, etc.

A small quantity of raw linseed oil rubbed over the hands before commencing work will prevent the paint drying hard on the skin and make it easier to wash off.

Do not use a cheap primer. It may be cheap as to cost, but it will cost less in the end.

Avoid using dry colors mixed by hand, for pinching costs. Dry colors cannot be thoroughly incorporated with oil without the aid of machine.

A hand-mixed paint made from dry colors will invariably peel, because only the outer particles of the pigment are properly coated with the oil, and when this oil is absorbed by the new wood there is left only a dry, porous coating, which will peel away from the surface as soon as the finishing coats start to contract in drying.

It is far more economical to apply one well rubbed oil coat of floor paint to verandah and steps once a year, than it is to defer the job for two or three years, and be under the necessity of applying two or three heavy coats.

With the once-a-year "lick," the perch will look fresh all the time, and be easy to wash and keep clean but with the "new-it-down to the boards" policy it will look shabby and down-at-the-heels most of the time.

More than that, the verandah that is painted every year will consume less paint by far than the one that is painted only once in three years.

### Children's Colds

Checked without "dosing." Rub on VICKS VAPORUM  
OVER 21 MILLION JARS USED YEARLY

### Paint Pointers

When applying shellac to knots and nippy places, do not apply it in too heavy a condition. Apply it thin and brush well into the knots and other places that require shellac.

It is quite common to see painters spreading shellac, not only over knots, but two or three inches beyond. This is bad practice and should be avoided. Use a small sachet tool for knotting and confine the shellac to the surface of the knot.

On woodwork that is to be finished in white, or in any light shade, use white shellac for the knots.

Before painting a surface be sure that it is thoroughly dry and in proper condition to receive paint.

When painting, always have a clean rag to keep the hands clean and remove spots from windows, hardware fittings, etc.

A small quantity of raw linseed oil rubbed over the hands before commencing work will prevent the paint drying hard on the skin and make it easier to wash off.

Do not use a cheap primer. It may be cheap as to cost, but it will cost less in the end.

Avoid using dry colors mixed by hand, for pinching costs. Dry colors cannot be thoroughly incorporated with oil without the aid of machine.

A hand-mixed paint made from dry colors will invariably peel, because only the outer particles of the pigment are properly coated with the oil, and when this oil is absorbed by the new wood there is left only a dry, porous coating, which will peel away from the surface as soon as the finishing coats start to contract in drying.

It is far more economical to apply one well rubbed oil coat of floor paint to verandah and steps once a year, than it is to defer the job for two or three years, and be under the necessity of applying two or three heavy coats.

With the once-a-year "lick," the perch will look fresh all the time, and be easy to wash and keep clean but with the "new-it-down to the boards" policy it will look shabby and down-at-the-heels most of the time.

More than that, the verandah that is painted every year will consume less paint by far than the one that is painted only once in three years.

### Clean Up, Paint Up, Keep It Up

Come on. Let's put things in order. Our whole town can and should be made as clean and orderly as its cleanest homes. Then we will have a safer, happier, healthier town.

Ambition in its highest conception is to dream big dreams and make them come true. The splendid ambition to have a town clean and beautiful will become a reality by the co-operation of all the people.

Away with the rubbish piles! Banish the plague spots! Clean up the streets and alleys! Cut the weeds, mow the lawns and trim the hedges! Repair and paint every building that needs it.

We need this thorough cleaning renovation. It is the sensible thing to do—for the health, safety, thrift, pride and happiness of all our people.

It is everybody's job. Every man, woman and child will be expected to help. Let there be no slackers.

### The Cost Of Corrosion

In a paper read before the Institution of Civil Engineers, by Sir Robert Hartfield, on "The Corrosion of Ferrous Metals," the startling statement was made that, according to his estimates, 20,000,000 tons of steel were lost by rusting in 1920. At 20 pounds a ton this would represent for the year the huge bill of \$80,000,000 pounds to which might be added another 120,000,000 pounds spent on operations rendered necessary by the corrosion. These figures refer to the whole world; but, as the "Electrical Review" pointed out, the major part of the huge bill of \$80,000,000 pounds would probably have to be debited to the British Empire, a sum equal to nearly half our total war indebtedness to the United States.

Was Very Careful

A man had recommended a friend of his for a job. "Is he fond of work?" asked the manager of the works. "Fond of it?" cried the friend and champion, "I should say he was! I never saw a man who could take such good care of work as he does. One piece of work will last him for a week."

"My Lord," said the foreman of an Irish jury, when giving the verdict, "We find the man who stole the mare 'Not Guilty.'"

"How's everything at home?"

"Oh she's all right."

### Pictures and Mirrors Give Finishing Touch

Pictures serve an admirable purpose in the decoration and furnishing of the small home.

By the very nature of their location on the wall they occupy none of the floor space that is so valuable in the small dwelling. If a little room has been rather crowded with furniture, pictures on the wall carry the eye upward and bring the attention from the lower part of the room to the upper, where there is a greater appearance of space.

Then, too, the subjects of the pictures may be chosen with a view to increasing the apparent size of the room. Pictures with a rather deep perspective give the eye a feeling of looking into the scene, down a corridor, into a valley, along a river, or otherwise creating an appearance of distance.

To do this removes much of the cramped feeling that invades a small room overcrowded with furniture.

The choice of color in pictures also will have much to do with the decorative scheme of the room, and the same effect of spaciousness can be created with the judicious use of mirrors.

### The Part Paint Plays

"Where poverty lives, there filth abounds," someone wrote, or said that a long time ago and it is quite true today. The solidity and prosperity of a town, or its poverty and shiftlessness, are indicated by its physical appearance.

"Paint and Pride Are Partners" is one of the slogans of the "Clean-up and Paint-Up Campaign," and it is a good one. The greatest incentive to cleanliness is paintlessness." is another true one.

Any community that wants the paint brush even more than the scrub brush. Walls and other surfaces which are properly painted contribute vastly to the welfare. They are easier to keep clean.

Good paint and varnish reduce the labor of keeping clean, promote health, inspire pride of ownership, multiply the joys of living and increase property values. There is no better time to paint up than when you are cleaning up, and there's little hope of keeping your premises cleaned up unless they're painted up.

### The Dandelion Digger

The dandelion is a pretty little flower for a few hours. Then the blossoms become an unsightly tuft of seeds which are lifted by the slightest breeze and blown over the yard or throughout the neighborhood. Then the dandelion soon becomes an unsightly weed which disfigures an otherwise beautiful lawn.

Dandelions attract mosquitoes and other undesirable insects. Get rid of the dandelion by enlisting the services of the children. Organize them into an army of dandelion diggers.

Any self-respecting home owner will pay the little tots ten to twenty-five cents per hundred for dandelion and other weeds that mar his lawn. You can appeal to the pride of the little folks by making them soldiers in this special army of fighters, and you will please them by a small cash reward for their work.

Grocer—"Then you don't want no berries?"

Customer—"No, I've changed my mind. I see your cat is asleep on these berries."

Grocer—"Oh, that'll be alright. I don't mind wakin' the cat up."

A biologist has declared that the ape is not man's ancestor, and that ought to be comforting to the ape.

### Has Only Three Streets

English City Is Probably Smallest In The World

St. David's, in Pembrokeshire, claims to be the smallest city in England, perhaps in the world. It is a village of three streets, containing barely a hundred houses, but it is technically a "city."

Although St. David's is 16 miles from a railway it is a popular holiday resort, owing to its gem of a cathedral and its rugged cliff scenery.

A movement to induce people living in overcrowded cities to move to the country is being started by the Italian Government.

**CHAPTER XVIII.—Continued**

"Come in," she called.

Donald followed Wainwright, his heart-beats' peculiarly accelerated. For an instant he could not distinguish objects in the dim interior. Then his eyes rested on Connie, sitting demurely in the corner. She wore a gingham dress of blue, with white collar and cuffs. A dark belt was fastened snugly at her slender waist. Tiny high-heeled shoes peeped from below the hem of her skirt. Her beautiful hair hung down her back in a huge braid that fastened at the nape of her slim, round neck with a narrow black bow. She rose and crossed the room to meet him; her high heels making her little little body appear much taller. There was something fragile about her beauty, some of the colour gone from her cheeks, and just a hint of shadows under her eyes.

Donald held out his hand. "Good evening, I'm glad to see that you are better," he said awkwardly.

A slender, warm hand crept timidly into his, and his fingers closed on it gently as on a flower. He stared down at her, thrilled by her loveliness. She raised her eyes with their bewilderingly long lashes slowly to his face. With a sudden leaping of his heart, Donald realized that he was in love.

They talked desultorily while Connie sat timidly on the edge of the uncomfortable chair. She could not feel at ease in the high, narrow shoes and the enveloping skirts. And as she essayed to cross the rough floor with an assumed air of ease, her ankles turned and she would have fallen had not Donald caught her in his arms.

As he raised her to her feet, she blushed furiously, and he fancied he could feel the warm beating of her heart. With an embarrassed apology, she slipped from him, crossed to the table and lighted a candle. And presently he took his leave, Wainwright walking with him down the darkening trail.

Wainwright was in one of his brooding moods. For a few minutes he was silent. As they neared the bluffs he spoke.

"After witnessing my daughter's distress the morning of the race I am afraid that you feel harshly toward me for allowing her to be placed in such a humiliating position. You have been exceedingly kind to us; therefore, I feel that I should relate the circumstances which have placed me in my present position. As I told you that day, I have allowed my pride to withhold from my daughter her inherited rights. I will be as brief as possible.

**Guard Against FLU —  
Sore Throat The First Warning.**

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with sore throat. Unless the germs are killed by some specific treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nervilene. The antiseptic properties of Nervilene quickly destroy the germs in the throat. Of course if the chest is sore Nervilene should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nervilene will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nervilene and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

**BOTHERED WITH ECZEMA 2 YEARS**

Itched and Burned. Formed Eruptions. Healed by Cuticura.

"My father, who took great pride in the family name, planned a political career for me even from the day of my birth. By natural taste and temperament I was quite unfitted for public life. I must have been a great trial to him, as from early boyhood I evinced a great love for the study of botany and ornithology. He would go into a red rage when he found me in the garden studying flowers under a microscope or stalking birds in the shrubbery."

"At college I was not a success, either socially or in my class. Always of a retiring nature, I did not enter social life, college sports, and the course of study set for me by my father bored me extremely."

"During my third year at college I met Connie's mother. Until that time no woman had entered my life, although my father had hinted his plans for my marriage as soon as I had finished my course.

"To me any flower shop, however small acted as a magnet. One day I stood gazing in the window of this florist's shop on the Strand. A girl was kneeling among the flowers, and as she lifted her head our eyes met. She was like a golden lily. Her hair was like Connie's hair, and the blue of her eyes was the blue of the pansies she held in her hand. And her name was Connie."

"He paused for an instant.

"Her father, who had been a rector in a small parish in the south of England, died just previous to my meeting, leaving his motherless child without kith or kin. Lest I weary you I may say briefly that we were married. My father would not even grant me an interview, but wrote to me saying that marrying as I had done had barred me forever from his door. I did not care. I was happy—completely, supremely happy. I sold a small estate bequeathed to me by my mother, and we set out for British Columbia.

"Ah!" he breathed softly, "that voyage! We could not afford it, but we travelled first-class—was it our honeymoon and we were young. We had never been to sea before, and the novelty of it all wove a spell about us. As we walked the deck we talked joyously of our wonderful future in the mysterious Great West."

"Our first year in Vancouver was one of blessed content. There is no love that could be greater than ours. Clerical work was scarce, so I took any job that offered. I would come through all kinds of weather: the house black with coat-dust or white with lime, and my wife would cry over my mess as she threw herself into my arms. We turned our hardships into jests."

A smile of infinite tenderness played about his eyes as memory recalled the golden days with the woman he loved.

"The next winter I was taken grievously ill. I lay helplessly on my back while my tender wife tramped from house to house teaching painting and music. Day after day made her daily rounds to keep us in bare necessities of life, and pay the doctor's bills."

Wainwright's voice sank and almost failed him for a moment. Regarding himself, he resumed his story.

"She would come home at night, tired and worn; to fall asleep in a chair by my bedside, while I raved in a fever. She went without food to buy dainties for me. She never lost her cheery smile—but it killed her. She died giving birth to—to—Constance."

Tears rose to his eyes, and for a moment he covered them with his hand. With a great effort he continued:

"I became embittered, changed completely out of any semblance to my former self. I cursed my father. I cursed the world. I would have welcomed death, but as I looked down at the tiny bite by my dead wife's side, I knew that I must fight to live.

"A short time after, I received from my father a letter in which he asked my forgiveness. I was unuttered to make my own way in the world, yet my father had turned me brutally away. My wife had died

**Flames From the Sun**

Sometimes Reach Height Of Half a Million Miles

Flames leap outwards from the surface of the sun at the rate of 26,000 miles a minute and sometimes reach a height of half a million miles, says Dr. Ferdinand Ellerman, of Mount Wilson Observatory, California. When these " prominences" were first noted, during a complete eclipse, early astronomers were divided as to whether they belonged to the sun or the moon. In 1868, Sir J. N. Lockyer, the astronomer, found he could observe them by a spectroscope without waiting for an eclipse, and proved that they issued from the sun. It was while studying these tongues of flame that he became convinced of the existence of helium.

"May I call on you?"

"I'm sorry, but I'm married."

"Well, I'm married and just as sorry."

Minard's Liniment prevents Flu.

**Selling Furniture From Nelson's Ship**

Three Pieces From Cabin To Be Disposed Of

Three pieces of furniture which Nelson used in his cabin in the Victory, and which today occupy their former position in the old battleship at Portsmouth, are to be sold by their owner.

The furniture consists of a mahogany dining table (which has folding leaves), sideboard, and wine cooler.

According to the description given in the cabin, the furniture was made by W. Wilkinson, of Ludgate Hill, in 1800.

When Nelson's body was being brought to England, the Victory put back into Rock Bay, Gibraltar, and the furniture was put ashore, where it is believed to have been secretly sold by one of Nelson's servants.

In 1804 it was bought by the grandfather of the present owner, who lent it to the Victory in October last.

**BABY'S OWN TABLETS WIN GREAT PRAISE****Many Mothers Always Keep Them In The House**

Thousands of mothers state that they knew of no other medicine for little ones to equal Baby's Own Tablets— that they always keep the Tablets in the house as a preventive of childhood ailments. These sicknesses do suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets Mrs. Eustice Ploude, Thigwick, Que., writes—"I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given my two little ones and I am glad to say that the tablets have always kept them in perfect health. I feel safe with the Tablets that I always have a box in the house."

Baby's Own Tablets are a mild laxative, but they sweeten the complexion and thus banish constipation and indigestion; break up colds and simple fevers and make the cutting of teeth painless. The Tablets are absolutely safe, being guaranteed free from all injurious drugs. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Real Thrillers**

The teacher had been talking about books.

"And what are your favorite books?" Jackson, she asked a young housewife near the bottom of the class. "Cookery books, Miss," was the astonishing reply.

"Cookery books" echoed the teacher. "Why?"

"Because they are so full of stirring incidents!"

**Record Of Juvenile Wonder**

Boy Born In 1721 Possessed Most Unnatural Ability

Old records cite the case of one juvenile wonder named Christian Helmicker, born in 1721, at Dubcek, who at the age of ten months could speak and repeat every word said to him. At twelve months he learned most of the Bible—Old and New Testaments. In his second year he learned history and geography. In his fourth year he mastered French. He was taken to Copenhagen before the King and proclaimed a wonder. He died June 7, 1723, from a weak constitution.

**How far would you go to be sure of a better Oil? -**

Knowing that a better oil means smoother performance, longer life, greater economy and bigger trade-in value for your car, you'd probably go a long way to be sure of a better oil.

That's what Imperial Oil Limited did—went all the way to tropical South America for the crude out of which to refine Marvelube.

There's lots of crude oil available right at Canada's front door. If Canada's largest and most modern refinery had been able to evolve as good an oil as Marvelube from locally available crude they would have been glad to do so. Peruvian crude made a purer, carbon-free, fuller-bodied oil—an oil that meant better lubrication—so Peruvian crude was decided upon.

The decision set a new standard in motor oils. Aircraft operators, the most particular buyers of oil, are enthusiastic about Marvelube because it has given them a longer period of operation between engine overhauls, and a greater margin of safety.

You can enjoy the same benefits in your car, and there is a grade of Marvelube that is refined to meet the exact requirements of your car. Consult the Marvelube chart at good service stations and dealers everywhere.

# Irma, Alberta

## Main Street

Mr. E. L. Elford is unloading a car load of new Chevrolet cars this week.

Mr. T. Askin arrived home from the University of Alberta Wednesday.

Dance in Keifer's Theatre, Irma, every Saturday night. Gents 55¢ and Ladies Free.

Mr. Joe Hammond, of Rivers, was in Irma last week and looking after his farm. While here Mr. Hammond rented his farm to Mr. Carter.

Mr. N. D. McMillan, of Bremer, spent the week end with his brother Mr. Mack McMillan in the Alma Mather district.

Mrs. G. S. Quast and Evelyn from Macklin Sask., have been visiting with Mrs. T. H. Barrett and Mrs. N. Matheson of Irma.

Mr. J. Klassen, has just completed boring a well for Mr. J. H. Elliott on his Irma property. Good water was struck at 38 feet.

Thos. G. Dark, Eyesight Specialist, will be at Irma Hotel, Monday, May 13th after 6 p.m. and Tuesday until 12 noon. Eyes Tested. Glasses fitted. All work Guaranteed.

Wheat seeding is practically completed in the Irma district. Most of the farmers are busy plowing for oats and barley. The weather for the past week has been ideal for farm work.

Mr. T. Schieck, of Wainwright has drilled a well for the residents of Jarow. The well, which is 265 feet deep has excellent soft water which is being appreciated by those who have been trying to use the hard water obtained from the shallow wells.

Mr. James Stead with his wife and two boys 3 and 5 years old have arrived from Glasgow, Scotland, to live on the Haydon farm on the S. W. of Section 7-40-8-4. Mrs. Stead's two brothers Wm. and George Peat, have accompanied them and are living with them until they secure work in the district.
